

WELCOME TO THE

TSK

TSK BLUEPRINT

WHAT IS TSK?

What is TSK?

TSK stands for **Trend, Structure, and Key Levels** — The three foundational pillars of market analysis that traders must master to navigate the markets with confidence and precision.

◆ Trend

Identifying the market direction (bullish, bearish, or ranging) helps align trades with momentum, reducing risk and increasing probability.

◆ Structure

Understanding how price forms highs, lows, and consolidations reveals the market's behavior and potential reversal or continuation patterns.

◆ Key Levels

These include major support/resistance zones, order blocks, psychological levels, and liquidity zones — crucial for timing entries and exits.

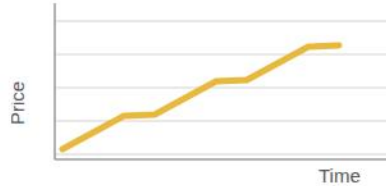

MARKET TRENDS

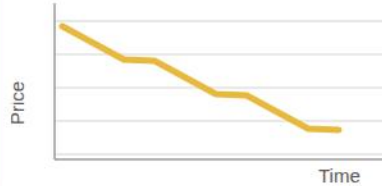

What Are Market Trends?

- **Definition:** The general direction in which a market or asset price moves over time.
- **Types of Trends:**
 - **Uptrend:** Higher highs and higher lows. Example: S&P 500 rallying during a **strong bull market**.
 - **Downtrend:** Lower highs and lower lows. Example: Bitcoin's decline during a **bear market in 2018**.
 - **Sideways Trend:** Range-bound movement. Example: **EUR/USD** trading in a narrow range for months.

☐ Bullish Market Trend

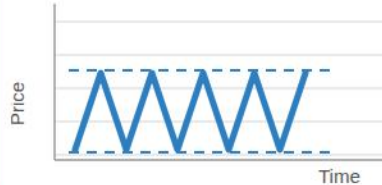

☐ Bearish Market Trend

↑ 5,600

NASDAQ 100

All-time High
↑ 26,300

Bitcoin

All-Time High
↑ 126,000

MARKET STRUCTURE

Market structure is the **story price tells** through its highs and lows. Read it right, and you always know **who's in control**.

HH — Higher High

Price breaks above the previous high. **Buyers are in control.**

HL — Higher Low

The pullback holds above the previous low. **Buyers are defending.**

LH — Lower High

The rally fails below the previous high. **Sellers are stepping in.**

LL — Lower Low

Price breaks below the previous low. **Sellers are in control.**

BOS — Break of Structure

Price smashes through a prior high or low. **The trend is shifting — or continuing with force.**

WHY IT MATTERS

► Confirms trend direction

Know instantly whether the market is trending up, down, or just chopping.

► Times your entries

Enter with the structure — never against it.

► Places your stops

Structure tells you exactly where your trade idea is wrong.

► Keeps you with momentum

Trade **with** the market, not against it.

UNDERSTANDING MARKET STRUCTURE

PRICE BREAK & RETEST

- A** Price Breaks
Above Previous High
- B** Retest Previous
Breakout Level
- C** Continuation
of Uptrend

1
Higher Low forms
Buyers defend the pullback

2
Higher High breaks
Buyers take control

3
Break of Structure
Price smashes the level

4
Retest
Broken level holds as support

5
Continuation
Trend powers higher

UNDERSTANDING MARKET STRUCTURE

PRICE BREAK & RETEST (BEARISH)

- A** Price Breaks
Below Previous Low
- B** Retest Previous
Breakdown Level
- C** Continuation
of Downtrend

1
Lower High forms
Sellers defend the rally

2
Lower Low breaks
Sellers take control

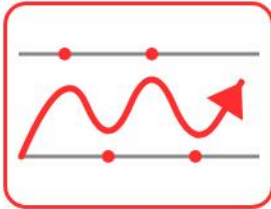

3
Break of Structure
Price smashes the level

4
Retest
Broken level holds as resistance

5
Continuation
Trend powers lower

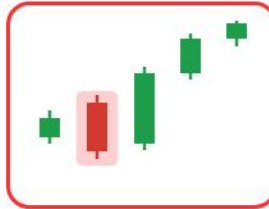

KEY LEVELS

Price doesn't move randomly — it **reacts at levels**. Master the four that matter most.

SUPPORT & RESISTANCE

Horizontal zones where price has reacted before. **Support** is the floor where buyers step in; **resistance** is the ceiling where sellers show up. The more touches, the stronger the level.

ORDER BLOCKS

The last opposing candle before a strong impulsive move — **footprints of institutional money**. Price often returns to these zones before continuing.

PSYCHOLOGICAL LEVELS

Round numbers — 1.0000, 100, 10,000 — where orders cluster. Markets respect them because **every trader** is watching them.

LIQUIDITY ZONES

Areas stacked with stop losses and pending orders: equal highs/lows, session highs/lows. Price hunts these zones to fill orders **before the real move**.

KEY LEVELS

TSK BLUEPRINT – UNDERSTANDING KEY LEVELS

A

First Touch

LEVEL IDENTIFIED

Price reacts at a zone for the first time. **Mark it.**

B

Second Touch

CONFIRMATION

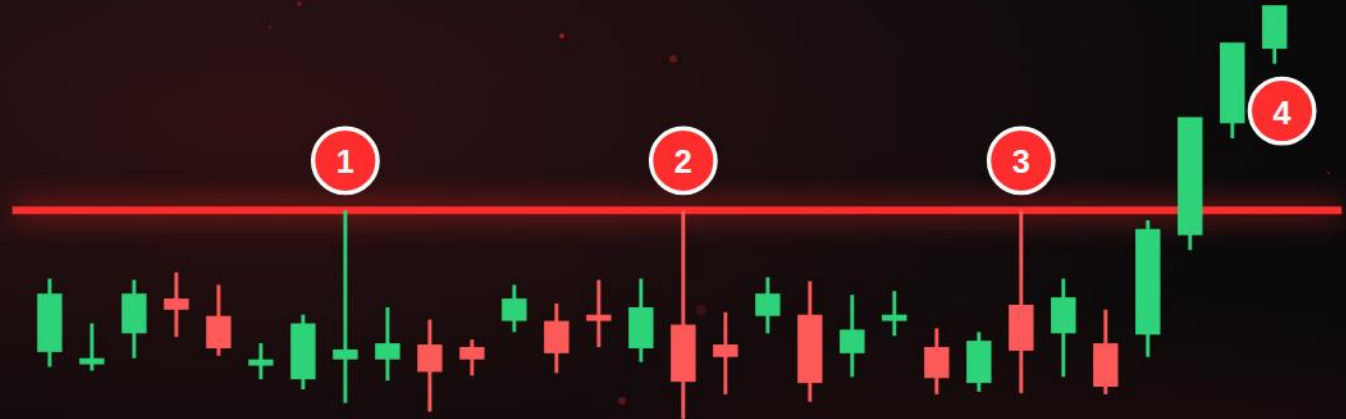

Price reacts there again. Buyers and sellers are **defending it** — the level is real.

C

Multiple Touches

LEVEL VALIDATED

Every touch proves the zone — but each touch also eats orders, so **expect the eventual break.**

THE PLAY ► wait for the touch → look for confirmation (break of structure + candle close) → enter on the retest. **No retest = no entry.**

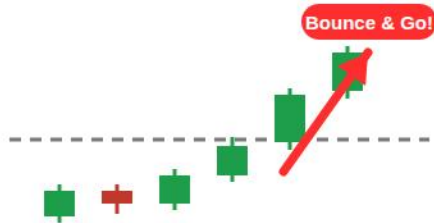

THE 3-STEP CONFIRMATION

STEP 1

BREAK OF STRUCTURE (BOS)

Identify a clear shift in market structure.

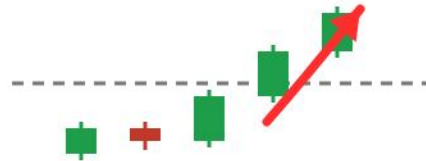

Identify a Shift in Market Structure

STEP 2

CLOSE ABOVE OR BELOW KEY LEVEL

(if price closes above, usually look for buys. If price closes below, usually look for sells)

Timeframe: 4HR Close

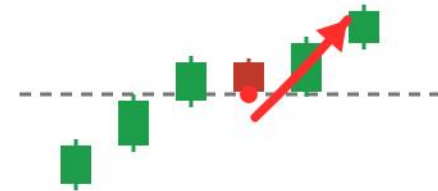

Confirm directional bias with a strong candle close

STEP 3

ENTER TRADE ON RETEST

Timeframe: 1HR Retest

(if there is no retest, there is no entry.)

Three rules. Every session.

EXAMPLE #1

TREND : BULLISH
STRUCTURE : PREVIOUS HIGHS
KEY LEVEL : @1963.000

EXAMPLE #2

TREND : BULLISH
STRUCTURE : BREAK & RETEST
KEY LEVEL : @153.200

BASIC TRADING STRATEGIES

There are various trading strategies in the market, here are a few so you are aware.

FOREX CHART PATTERNS

TECHNICAL & FUNDAMENTAL ANALYSIS

DOUBLE TOP

HEAD & SHOULDERS

RISING WEDGE

DOUBLE BOTTOM

INVERTED HEAD & SHOULDERS

FALLING WEDGE

There are various trading strategies in the market, here are a few so you are aware.

- 1 **SCALPING:** Short-term trades aiming for small profits, and minimal pips.
- 2 **DAY TRADING / INTRA DAY:** Opening and closing positions within same trading day (4-6 hours in single trade).
- 3 **SWING TRADING:** Holding positions for several days or weeks based on technical and fundamental analysis or your preferred strategy.

WHY TSK IS POWERFUL

- 1 **TSK simplifies** complex trading analysis, making it easier to spot high-probability trades.
- 2 **Combines proven** methods to build confidence in trade execution.
- 3 **Equip traders** with a strategic approach for better decision-making and profitability.
- 4 **Enhances risk** to reward and helps you find sniper entries with tight stops and big reward zones making it easier to maintain 1:2, 1:3 or better R:R setups.
- 5 **Scalable for growth** once mastered, TSK becomes duplicatable for students and groups anywhere and also seemingly foundational for consistency.
